

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended): A portable communication device, comprising:

location data receiving means for receiving reference location data from a plurality of location base stations provided on satellites and/or the ground,

location detection means for detecting location information indicating a location of the device based on the reference location data received by the location data receiving means,

information input means for inputting identifying information of a communication terminal device to which the location information is to be transmitted,

a send key to be manipulated when the location information is transmitted to the communication terminal device, and

transmitting means for converting the location information detected by the location detection means to a radio signal and transmitting the radio signal to the communication terminal device having the inputted identifying information via a switching office of the telephone line network, when the transmitting key is manipulated.

Claim 2 (currently amended): A portable communication device according to claim 1, wherein when the send key is manipulated, the transmitting means converts to a radio signal notification information that a location indicated by the location information is a present location of the user to transmit the radio signal to the communication terminal device having the inputted identifying information via the switching office of the telephone line network.

Claim 3 (currently amended): A portable communication device according to claim 1, wherein the device is equipped with an image pickup device, and when the send key is manipulated, the transmitting means converts to a radio signal image data obtained from photography by the image pickup device to transmit the radio signal to the communication terminal device having the inputted identifying information via the switching office of the telephone line network.

Claim 4 (currently amended): A portable communication device according to claim 1, wherein the location detection means comprises:

information storage means for storing therein a plurality of items of location information including map information and/or address information, and

information extraction means for extracting one item of location information indicating the location of the portable communication device out of the plurality of items of location information based on the reference location data received.

Claim 5 (currently amended): A portable communication device according to claim 4,
~~which comprises~~ further comprising:

one or more displays for showing information,
an image pickup key to be manipulated when the image is photographed, and
transmit display processing means for showing on the one or more displays the detected
location information and the image photographed by the image pickup device when the image pickup
key is manipulated.

Claim 6 (currently amended): A portable communication device according to claim 5,
wherein the device is equipped with two displays, and the transmit display processing means has the
detected location information shown on one display, and has the image photographed by the image
pickup device shown on the other display.

Claim 7 (currently amended): A portable communication device according to claim 5,
wherein each item of location information includes map information at least, and the transmit display
processing means has the location of the device shown to be superposed on the map information
shown on the one or more displays.

Claim 8 (currently amended): A portable communication device according to claim 5,
~~which comprises~~ further comprising:

radio signal receiving means for receiving a radio signal from the switching office of the
telephone line network, and

receiving display processing means for showing on one or more displays the location
information constituting the radio signal received by the radio signal receiving means and the image
having image data constituting the radio signal.

Claim 9 (currently amended): A portable communication device according to claim 6,
~~which comprises~~ further comprising:

radio signal receiving means for receiving a radio signal from the switching office of the
telephone line network, and

receiving display processing means for showing on one of the displays the location
information constituting the radio signal received by the radio signal receiving means, and showing
on the other display the image having image data constituting the radio signal.
